GLOVE PROTECTION GUIDELINES

Facts and Tips about Gloves:

- Gloves protect your hands from the following workplace hand injuries: sharp objects, abrasive surfaces, moving components, wet environments, chemicals, blood-borne pathogens and viruses.
- You must follow a safe procedure for removing gloves so soil, chemicals or viruses do not come into contact with your hands. Remove one glove from top to bottom with the other gloved hand. Then, tuck the first glove into the other gloved hand and peel off the second glove from the inside.
- The glove cuff style is an important consideration based on the protection needed. Some cuffs will allow the glove to be removed quickly or allow ventilation.
- There are several standards and ratings for cut-resistant and coated gloves (i.e. EN, ANSI, ASTM, etc.). Compare similar standards when choosing gloves because ratings can be determined based on different testing methods.
- If you have an allergy to latex or rubber, look for gloves that contain no latex such as vinyl or nitrile.

Size and Fit Matter:

Size and fit are very important to properly protect your hands. Poorly fitted gloves will not be worn and increase the chance for hand injuries.

Too small: make hands fatigue while providing less dexterity and decrease productivity

Too big: more likely to get caught in moving components and not have proper dexterity

Measure your dominant hand with a tape measure around the palm and knuckles.

Here are some general guidelines for men's sizes.

7.5 – 8" – Small 10.5 – 11" – X-Large
8.5 – 9" – Medium 11.5 – 12" – XX-Large

General guidelines for women's sizes.

6" – X-Small 7.5" – Large
6.5" – Small 8" – X-Large
7" – Medium

Questions to Consider When Buying Gloves:

- In which task or application will you be wearing gloves for protection?
- What types of gloves do you use? Why?
- What types of hand injuries happen in your work area?
- What do you like or dislike about your gloves?
- If you can change one thing about your gloves, what would it be?
- What are the costs of the gloves you have purchased recently?

Gloves by Application:

- **There is no one glove that will fit each job or situation. Assess the job and protection needed to purchase the right glove.** Below is a chart that shows the types of gloves commonly found in various applications.

GLOVE TYPES AND ATTRIBUTES

Unsupported: (Chemical Protection)

(Disposable and Multi-Use)

Reliable and economical protection.

Materials: Butyl, Latex, Neoprene, Nitrile, Vinyl.

Uses: Small part handling, food handling, medical and lab use, manufacturing.

Attributes: All latex, vinyl and polyethylene disposable glove component materials comply with relevant federal regulations for food contact. Many are Medical Grade, Class 1 Medical Device approved. Nitrile and vinyl are great alternatives for those with latex allergies. Ideal for tasks when greater dexterity is needed.

Supported: (Chemical Protection)

(Cut/Sewn, Dipped and Cut Protection)

Materials: Butyl, Neoprene, Nitrile, PVC.

Uses: General cleaning, chemical processing.

Attributes: Delivers a varying degree of cut protection and enhanced grip.

Leather: (Leather Palms, Drivers and Welders)

Provides durability, dexterity and comfort.

Uses: General and medium-duty tasks.

Attributes: Leather palms (shown left) are a popular type of leather glove.

Lined leather gloves provide added warmth in cold environments.

Cotton: (Canvas, Jersey and Terrycloth)

Cotton material is cut and sewn together in glove pattern.

Uses: These can keep hands clean and protect against abrasions, but may not be strong enough to handle work with rough or sharp materials.

Attributes: Good abrasion, some with enhanced thermal protection.

Strings: (String Knit, Dipped and Cut Protection)

Fibers are knitted together in glove pattern.

Uses: Light-duty tasks.

Attributes: Allows hands to breathe and reduces perspiration. Provides protection and dexterity. Can be used as a liner for extra protection. Coated/Dotted knits also provide extra grip.

Coated or Dipped Seamless Knit:

(Ninja, Flex, Tuff, UltraTech and Memphis)

Glove is dipped in a polymer coating for added protection.

Uses: Some chemical handling, cleaning, oil refining, food processing.

Attributes: Coatings protect against solvents and chemicals, abrasions, punctures and cuts.

Cut Protection: (Supported, Strings and Synthetic)

Protects hands from sharp edges such as blades, glass, metal, ceramics, etc.

Uses: Medium to heavy-duty tasks.

Attributes: Materials can vary, such as Kevlar®, Dyneema® or composite yarns (HPPE). Not effective in protecting against punctures or power equipment.

Multi-Task: (Leather, Synthetic and Cotton)

Extra material offers more protection.

Uses: Tasks that require superior or specific area protection but with dexterity, grip and working with small parts.

Attributes: Offers specific protection areas and materials depending on the particular task.

European Directives for Personal Protective Equipment

European Standard EN388 established the criteria necessary for rating all PPE items. Many of our hand protection offerings meet these standards – reflected with the CE logo – and have a 4-digit performance rating that measures abrasion, cut, tear and puncture resistance (ACTP).

A glove's overall performance score is indicated by four numbers that represent the four test criteria. The higher the number, the better the performance. Manufacturers may use an X to indicate not tested.

	Criteria	Rating
A	Abrasion Resistance	0-4
C	Blade Cut Resistance	0-5
T	Tear Resistance	0-4
P	Puncture Resistance	0-4

PROTECT YOUR EYES!

Personal protective eyewear, such as goggles, safety glasses and faceshields, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in ERs and more than 100 result in a day or more of lost work. The majority of injuries occur because of small particles or objects striking or abrading the eye.

Having the right protective eyewear is critical in preventing eye-related injuries.

Before choosing eye protection, identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination with a faceshield as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision should be considered, with safety glasses large enough to allow the user to wear their own glasses underneath.

www.cdc.gov/niosh/topics/eye

Eyewear Types

Safety Glasses protect against general impact; however, speed of impact must be considered. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice. **See pages 329-333.**

Goggles are available in direct and indirect vented styles. **See pages 333-334.**

Direct vented goggles allow airflow, but are only approved for protection against particulates. Use for jobs such as grinding or cutting where dust is an issue.

Indirect vented goggles are for protection against vapors, chemicals, liquids and dust.

Full Faceshields are the best option for workers exposed to flying particles or chemical splashes. Use in conjunction with safety glasses or goggles to protect against secondary hazards. **See page 335.**

Eyewear Features

UV Protection—for workers exposed to ultraviolet radiation, such as outdoor workers and welders.

Hard-Coated—for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist—for workers who are exposed to extreme temperatures or warm humid environments.

Clear Lenses—for indoor or outdoor applications in below-normal light conditions.

Gray or Brown Lenses—for outdoor use where above-average light is available.

Amber Lenses—for applications where light is below normal or enhanced contrast is needed.

HEARING PROTECTION

NRR footnote

*Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

Choking Hazard – Keep away from infants and small children. These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M PSD Technical Service in the USA at 800-243-4630. In Canada, call Technical Service at 800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing earplugs. Failure to do so may result in hearing loss or injury. **Noise Reduction Rating (NRR):** 3M strongly recommends fit testing of hearing protectors. If NRR is used to estimate typical workplace protection, 3M recommends that NRR be reduced by 50% or in accordance with applicable regulations. See *User Instructions* for more information.

Make Fire Safety a Priority!

Each year more than 5,000 people are injured in fires and explosions on the job.* Keep extinguishers within reach to safeguard your workplace. OSHA standards require employers to provide proper exits, firefighting equipment, emergency plans, and employee training. A fire safety program is critical for employee safety and facility compliance — make sure yours includes fire extinguishers and smoke alarms.

C – E Maintenance Sorbent Lightweight, versatile, and takes just minutes to put in place. Dust-free and contains no abrasive granules that can damage expensive equipment. Can be incinerated or fuel blended, leaving less than 0.2% ash. Wring out and reuse numerous times with virtually no loss of sorbent capacity. Allows you to get at the source of a leak before it becomes a bigger problem.

C High-Capacity Maintenance Sorbent Pad Highly absorbent and nongranular so it's perfect for placing directly on machinery. Will not damage plant equipment. Low profile so it fits in tight places. Tuck it in or around machines to catch and contain leaks at the source.

ID No.	Absorbing Volume (Unit)	W × L	Qty.	Unit	Price

* ASTM F 726. 3M products must be used in accordance with OSHA regulations, warnings and limitations for each product.

D High-Capacity Maintenance Folded Sorbent Four sorbents in one. It can be used as a boom, pillow, pad, or roll, which means you stock one product to meet your sorbent needs. Perforations every 16 inches allow you to select the length required, so there's less wasted sorbent. Comes in a handy dispenser box for easy, on-site use. 3M's high capacity sorbent technology: has increased fluid-holding capacity which means less sorbent used; allows for simple reclamation for recycling of valuable liquids and re-use of sorbent; and minimizes sorbent waste for disposal.

3M **WARNING!**

FAILURE TO PROPERLY HANDLE AND DISPOSE OF SORBENTS CONTAMINATED BY HAZARDOUS MATERIALS MAY RESULT IN SERIOUS PHYSICAL INJURY OR DEATH AND/OR ENVIRONMENTAL HARM. For proper handling, consult the *Safety Data Sheet* for the material adsorbed, and applicable safety and health standards, contact your supervisor, or call 3M at 1-800-243-4630. To reduce the risk of serious injury or death, adequate precautions should be taken when handling or storing sorbents contaminated by hazardous materials, and appropriate personal protective equipment should be worn. Transportation and disposal of container and its contents must comply with applicable laws and regulations. 3M™ Maintenance Sorbents and 3M™ Petroleum Sorbents must not be used with aggressive liquids, including caustics, acids, oxidizers, and reactive chemicals. 3M™ Chemical Sorbents can adsorb most acids, bases, and other hazardous fluids.
